

## MAKING A DIFFERENCE IN THE COVID-19 ENVIRONMENT

SFU VentureLabs supports numerous life science, digital health, and technology companies solving real world problems for physicians, patients, and health systems - including solutions available today that can help Canada, and the rest of the world manage the COVID-19 environment.

---

Agartee provides a real-time, remote symptom monitoring and early detection solution that can alert families and physicians for “at-risk” individuals, like seniors and those suffering from COPD and asthma.

**COVID-19 Support:** Remote monitoring ensures individuals get care when they need it, as well as reducing potential exposure for caregivers, healthcare workers, and early responders, ensuring that these critical resources in the health system are free to treat patients requiring immediate and urgent care.

Bio Conscious is a health analytics company delivering machine learning solutions to doctors and patients which improve health through proactive management.

**COVID-19 Support:** People with diabetes are at increased risk of infection by viruses like COVID-19. To ease the burden on clinics and hospitals working with patients with diabetes, Bio Conscious has made its product Endobits free for two months to users. Endobits delivers patient data to clinics in a prioritized format, allowing providers to address those in need of intervention quickly, without requiring a trip to the hospital.

CuePath is a fully managed Medication Adherence as a Service (MAaaS) solution for home care agency and healthcare partners with automated alerts and human call reminders. It enables families and care providers to remotely track medication intake of their loved ones, helping alleviate the stress associated with caregiving.

**COVID-19 Support:** As family and nurses are restricted from visiting seniors in care homes, CuePath enables pharmacy and home care partners to provide remote medication monitoring. As stress of isolation and lack of home care services increase the risk of non-adherence, CuePath responds by alerting care providers when issues arise, and by providing telephone reminders to keep seniors safe during the pandemic.

Curatio enables payers, providers and pharma to engage with patients on their own social networks. Used by some of the largest healthcare organizations around the world, Curatio helps connect patients and families to the daily disease management, adherence and personalized peer support they need to achieve their best outcomes.

**COVID-19 Support:** Dedicated private social network with health-tracking tools, community support, and health insights designed specifically for COVID-19. This connects and supports socially isolated, vulnerable populations, reduces burden on local healthcare systems, and tracks disease.

Medimap connects patients with doctors online in minutes. Medimap Virtual Care lets physicians meet their own patients through secure video consults, as well as remote “walk-in” patients across the province who may be waiting to connect with a doctor.

**COVID-19 Support:** Providing doctors quick, easy access to video consults while offering patients access to healthcare without leaving their homes. Available to medical practitioners and patients across Canada.
